

Your Fast-Reply Plan

Three simple changes to stop warm leads from going cold.

WHAT ONE MISSED LEAD CAN COST

A 10% response leak x [deals/mo] deals = \$[rough]/month you cannot see

DO THESE THREE THINGS

1

Build the tracker

Source, received, responded, gap, closed. Log one week.

2

Triage the queue

High-intent to the fastest. General to rotation.

3

Measure the leak

Find the slowest channel or person, then close it.

SAVE THESE REPLIES

Settings > General > Keyboard > Text Replacement

;log

[Name] reached out re [topic]. High intent. Flag if over [2h].

;hi

Thanks [Name] - moving on this. Routing to [person], our fastest.

;cover

Escalate: [Name] quiet since [time] on [topic]. Cover now.

Knowing what to do is the easy part. The hard part is watching every inbox, replying quickly, and following up.

Want us to handle the follow-up for you?

UTG Labs responds, follows up, qualifies, and books your inbound leads.
